

Testimonial of Successful Neurosurgery by Vydehi Hospital

Sometimes, despite the cautions, our destiny leads us to major accidents. Basanti Majumdar, from West Bengal, was involved in one such traffic accident on 26th December 2022. This middle-aged lady sustained a fracture of the odontoid, i.e., the fracture at the junction of the head and neck. As a result, she developed weakness in all four limbs, leading her to get bedridden. After two weeks, she was brought all the way from West Bengal to the Vydehi Institute of Medical Sciences Research Centre situated in Bangalore, Karnataka. She was evaluated and underwent a major neurosurgical procedure to fix the fracture. Thanks to the expert team of Vydehi Hospital headed by Dr. Anantha Kishan, the lady gradually gained mobility, and the best part is Basanti Majumdar started walking within ten days of surgery.
