

Vydehi Institute Successfully Hosts ISACON Karnataka 2024 POCUS Pre-Conference Workshop

This informative and engaging workshop empowered healthcare professionals with advanced Point-of-Care Ultrasound (POCUS) skills, equipping them for improved patient care. The workshop, led by esteemed faculty from leading institutions, offered a unique learning experience through Asia's largest High Fidelity Simulation Centre

Vydehi Institute of Medical Sciences and Research Centre (VIMS & RC) successfully hosted the POCUS Pre-Conference Workshop for ISACON Karnataka 2024 on August 8th, 2024 at VASA, Vydehi Advanced Simulation Academy, Bangalore.

Participants benefitted from hands-on sessions, focused discussions on various POCUS applications, and in-depth coverage of perioperative care, emergency medicine, and critical care

| Feature | Description |
|---|---|
| First-time workshop on High Fidelity Simulation (HFS) in India | Participants gained experience with the latest simulation technology |
| Virtual Reality (VR) powered simulation | This immersive technology allowed for the realistic practice of POCUS procedures |
| Unlimited attempts for procedures | Participants had ample opportunity to refine their skills |
| Comprehensive POCUS procedures covering head-to-toe | The workshop covered a wide range of POCUS applications |
| In-depth coverage of Perioperative Care, Emergency Medicine, and Critical Care | Participants learned how to use POCUS in various clinical settings |

We express our sincere gratitude to the ISACON Karnataka team for their collaboration in making this event a grand success.

Vydehi Institute remains committed to providing exceptional educational opportunities and fostering advancements in healthcare.

Stay tuned for upcoming workshops and events!
